

Your Trusted Partner

in learning, productivity, and testing

Corporate Overview

Solutions Thru Software (STS) has continually offered automated testing solutions to motor vehicle agencies for over 20 years - longer than any other company in the industry. As we have grown, so too has our reputation for providing easy-to-use, feature rich software with unparalleled performance and reliability.

“The heart of STS is our team, a group of people with a passion for research and a long term commitment to developing software products dedicated to increasing the integrity of the driver’s license and the efficiency of the motor vehicle office environment.”

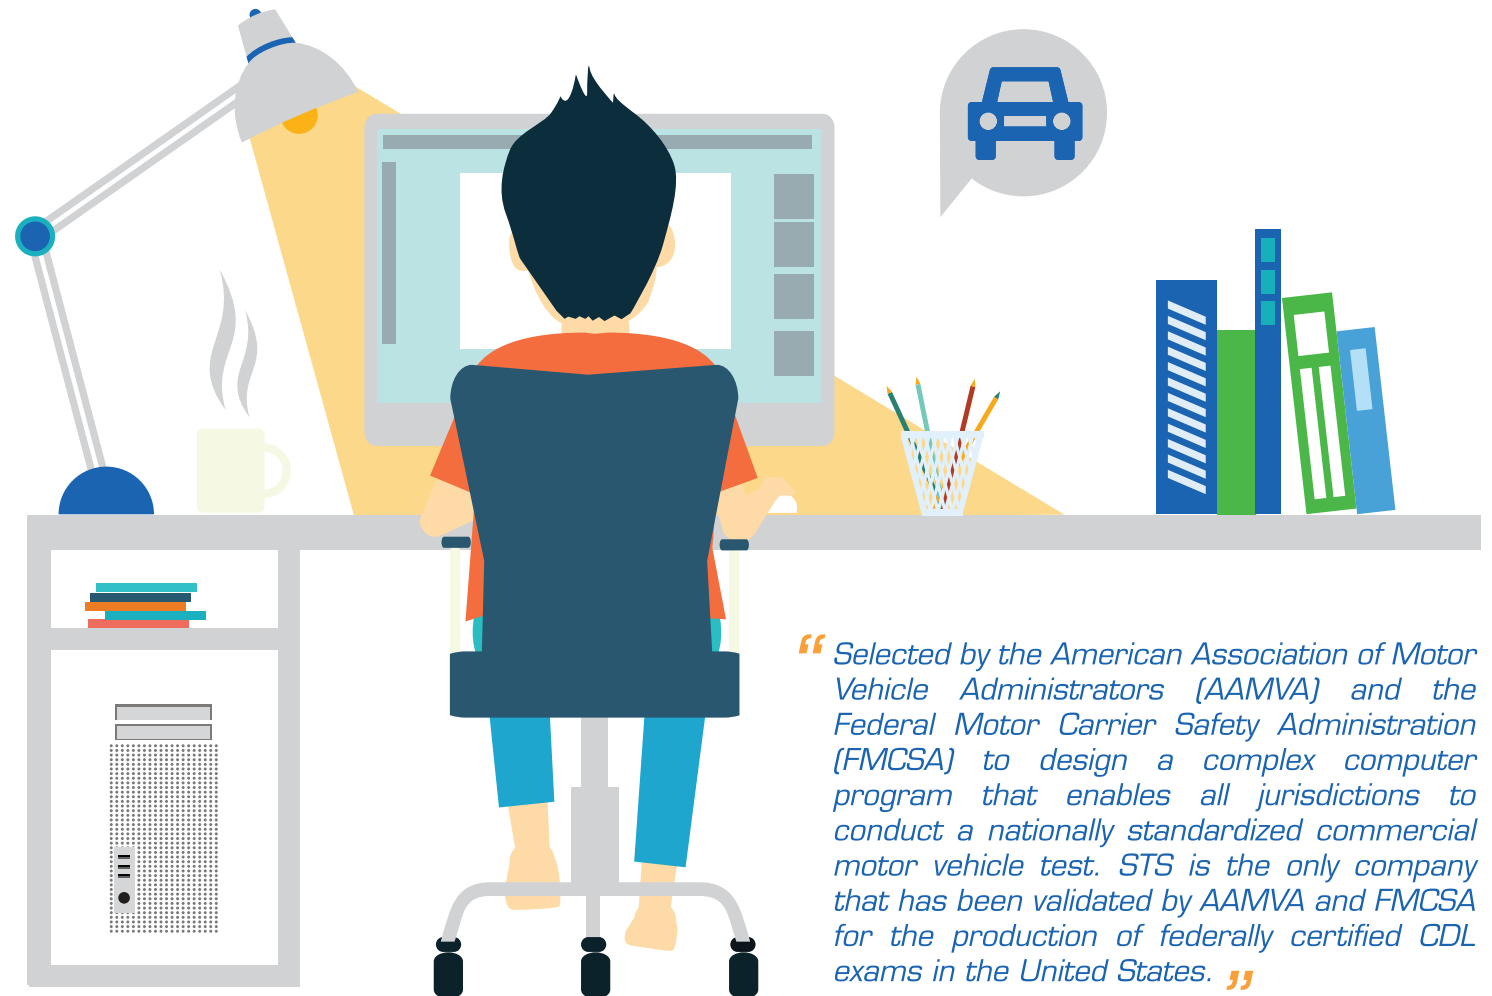

STS is a reputation-oriented business and although we pride ourselves on leading edge technology, we also follow an “old school” methodology when it comes to problem resolution and contract interpretation. Our goal is to ensure happy and satisfied customers. We understand that despite the great care that goes into solicitation development and contract preparation, some items may be missed. STS will work in good faith with you to ensure the final product meets your expectations.

It is common for customers to comment that “Solutions Thru Software is the best vendor we have ever worked with..”, and that we “go beyond the scope and requirements of the contract.” We are proud of the fact that we have developed ongoing, long-term business relationships with many jurisdictions and this number continues to grow every year.

From our first contract with Delaware, STS has experienced tremendous growth and we are proud to note that we operate services across North America. Included among the jurisdictions we support is the State of Florida. With a population of over 20 million people, our product, Examiner, administers over 4,000 tests daily through a complex system involving state offices, tax collector offices, third party agent proctored environments, and school settings.

“We are proud to say that our first customer, the State of Delaware, is still a STS customer today. Over the years, they have enjoyed continual upgrades to their Examiner system and today, they are operating an up-to-date version of the software as a result of their ongoing maintenance contract with STS.”

Our U.S. operation, Solutions Thru Software Inc., is incorporated in the State of Nevada with physical corporate presences in Henderson, NV, Columbus, OH, and San Antonio, TX. Solutions Thru Software Ltd. is based out of Medicine Hat, Alberta, Canada.

“Selected by the American Association of Motor Vehicle Administrators (AAMVA) and the Federal Motor Carrier Safety Administration (FMCSA) to design a complex computer program that enables all jurisdictions to conduct a nationally standardized commercial motor vehicle test. STS is the only company that has been validated by AAMVA and FMCSA for the production of federally certified CDL exams in the United States.”
